

Initiatives taken by JNPT hospital to fight against Covid-19

As per directives of the State Govt authorities and the Hon Chairman, Dedicated COVID Health Centre (DCHC) is functional at JNPT Hospital to cater to JNPT beneficiaries and private persons suffering from moderately severe COVID 19 disease. All necessary arrangements, including setting up of central oxygen manifold system has been made for the same. Several patients are taking benefit of this facility, and many patients have been discharged after successful treatment. JNPT Hospital continues to provide other measures to tackle the pandemic such as running Fever OPD, testing (RT-PCR and Rapid antigen testing), tracing and isolation of patients, as well as education and counselling regarding the disease. Doctors, nurses, para-clinical professionals and support staff are continuously updated with information and updates on COVID 19 disease through in-house training sessions and external webinars. Care is being taken that non-COVID patients also continue to get treatment through regular OPD, emergency and admissions, ANC clinics, Immunization-cum-well baby clinics, dental care etc.
